29 July 1988

MEMORANDUM FOR: Director, Security Evaluation Office

FROM:

Director of Security

SUBJECT: WWSB Cable Director 172231

1. The record should show that the subject cable was not coordinated with me or anyone else in the Office of Security. In fact, I did not see the cable until after it was released.

2. Had I seen the cable in draft form, I would have questioned the wisdom of going worldwide with a message that the DCI Judge Webster is differing in opinion with Secretary Shultz on the interpretation of the presidential directive. I am not sure they would admit to that characterization and even if they were to acknowledge a difference of opinion, would they agree going worldwide with a cable that states such?
